EDUCATION

CVR College Of Engineering

Bachelor of Technology, Computer Science and Engineering

2023 – Present

CGPA: 8.85

PROJECTS

Crafter - AI-Powered Marketing & Website Builder

React, TypeScript, Vite, Firebase Auth, Firestore, Google Gemini API, Tailwind CSS, shadcn/ui, Radix UI, Recharts

- Developed an AI-powered SaaS marketing platform using React, TypeScript, Firebase, and Google Gemini API to generate responsive websites, marketing emails, business insights, and chatbot responses from natural language prompts.
- Built protected authentication flows with Firebase Auth, email verification, onboarding, and Firestore-backed business profile storage, ensuring secure user management.
- Implemented AI modules for responsive website generation, email copywriting, business insights, chatbot assistance, image generation, influencer filtering, and analytics dashboards.
- Designed reusable UI components with shadcn/ui, Radix UI, and Tailwind CSS, delivering a polished SaaS-style experience with responsive layouts and interactive previews.

Sahara - Intelligent Safety and Emergency Response Ecosystem

React Native Expo, Maps, ESP32, Mesh Networking, IoT, Geolocation

- Developed an AI-powered proactive safety platform that predicts and detects threats using multimodal AI models, including audio stress analysis, vision-based behavior recognition, and contextual risk assessment.
- Built **Saathi**, an ESP32-based companion device creating a decentralized mesh network for emergency communication and location sharing in cellular-poor areas.
- Implemented smart safety navigation leveraging crowd density, lighting conditions, and incident heatmaps to recommend safer routes, reducing exposure to high-risk zones.
- Integrated multilingual voice-activated SOS, automatic emergency alerts, and secure evidence collection through real-time audio, video, location logging, and a community assistance ecosystem connecting nearby volunteers.

ACHIEVEMENTS

Winner - J.P. Morgan Chase Code for Good Hackathon

- Led frontend development and designed the UI/UX for a technology solution supporting the NGO PANS (People's Awareness Network Society).
- Crafted an innovative solution with multiple features to establish trust and communication in remote areas.
- Collaborated with mentors and teammates to bring the idea to life in just 15hrs of floor time.

VOLUNTEERING

Cybernauts Student Club CVRCE

July 2024 – Present

Documentation & Tech Co-Lead

- Co-led documentation and technical initiatives for workshops, hackathons, and tech events, integrating AI-powered analytics to streamline planning, execution, and post-event reporting.
- Developed automated templates and internal tools for event documentation and tracking, enhancing process efficiency and supporting over 30 workshops.

International Startup Festival

July 2024

Volunteer

- Facilitated 15+ round table discussions and investor connection sessions, automating interaction logs and feedback capture to improve engagement.
- Managed end-to-end registration processes, ensuring a seamless check-in experience for 200+ attendees through automated flow.

CERTIFICATIONS/COURSES

- Front End Web Development - **Meta (Coursera)**
- Generative AI Workshop - **IIT Hyderabad**
- HackerRank:** Java (Basic) | Python (Basic) | Problem Solving (Basic)

TECHNICAL SKILLS

Languages: Java, C, Python, JavaScript

Frameworks/Tools: NextJs, NodeJS, ExpressJS, ReactJS, Bootstrap

Cloud: AWS (EC2, S3, Bedrock), GCP (Vertex AI), Vercel, Docker, Kubernetes

Developer Tools: Git, Visual Studio, Eclipse

Relevant Coursework: Algorithms, Data Structures, Object-Oriented Programming, DBMS, Computer Networking, Operating Systems
